

Aqua Cure

TOTAL WATER MANAGEMENT

within the catering / hospitality sector

COMBI SYSTEM

Quality water for multiple applications.

STEAM

Supports consistent steam and long-lasting equipment with less maintenance and down-time.

WAREWASHING

Filtration means spot-free glassware, less energy consumption and fewer breakdowns.

ICE

Quality water means hard, crystal clear cubes and less maintenance.

SOFTENING

(Non-drinking / food prep)
Quality water means less equipment down-time due to limescale.

SOFT DRINKS

Quality water supports crisp, clean taste and better system performance.

COFFEE

Quality water means less bitterness, more flavour and less maintenance down-time.

ESPRESSO

Quality water means perfect extraction, perfect crema and less maintenance downtime.

ICED TEA

Quality water provides perfect clarity and great taste.

DRINKING WATER

Quality water is chemical and dirt free to give a fresh, crisp taste.
